EDUCATION

UT Austin: *MS in Operations Research and Industrial Engineering (ORIE)* (Present)
COEP Tech University: *Major: Planning (Civil Engg. Dept.), Minor: Mathematics (Finance) | GPA: 7.93/10 (2020)*
Coursework: Statistical Methods I and II, Probability Theory and Statistical Inference, Applied Finance

WORK EXPERIENCE

Senior Associate Consultant - Data Science | Aspect Ratio | Pune Jul, 2022 - Jul, 2026

- Led real-world patient-level claims data analyses on ELAAD and Optum datasets using SQL and Databricks to assess treatment persistency and therapy switching for multiple drug classes and products, generating evidence to inform the clinical study design of a pipeline drug for a Fortune 100 pharmaceutical company.
- Led the design and development of forecasting simulation models for a **\$2B+** revenue drug franchise, integrating scenario simulations (e.g., launch timeline, market size, catchup cohort, etc.). The models were instrumental in validating a **10M+ doses opportunity** and accelerating strategic decision-making for senior-level leadership with real-time insights.
- Led the end-to-end design and deployment of scalable analytics solutions which included Power BI dashboards for consolidating and reconciling multi-source forecast data for a **\$1B+** revenue franchise enabling real-time discrepancy detection, reducing manual effort by 50%, and low-latency Tableau dashboards for a Fortune 500 FMCG company. Integrated real-time backend ingestion via GCP with SQL query optimization, cutting KPI reporting turnaround time by 75%.
- Developed and rolled out a **PowerApp-integrated transport optimization solution**, enabling on-ground teams at a Swiss-based manufacturing plant (of the same FMCG client) to input and track logistics data seamlessly. Supported analytics-backed decision-making by integrating operational inputs into the broader Power BI reporting suite.

Associate - Decision Analytics & Business Operations | ZS Associates | Pune Dec, 2020 - May, 2022

- Led promotion response modeling and built marketing mix models using multivariate regression and other supervised ML algorithms to optimize channel-level budget allocation for a Fortune 100 healthcare conglomerate. Generated data-driven insights that guided the strategic distribution of an **\$11M marketing budget** across key promotional channels.
- Built a segmentation model to classify ~10K HCPs into prioritized tiers, enabling strategic allocation of limited marketing resources. The solution supported a targeting strategy that delivered **\$15.2M** in additional cost savings.
- Designed, implemented, and periodically evaluated incentive compensation plans for a US-based pharma client using a proprietary platform. It covered mid- and senior-level sales leadership, with a total incentive value of **\$20M+ annually**.
- Conducted internal training sessions on regression modeling and foundational statistics for junior associates.

GIS/RS Trainee - ML Group | Geospatial Design Labs | Nashik Aug, 2020 - Dec, 2020

- Helped in developing a framework for employing machine learning algorithms by using numerous remote sensing indices for automating the LULC mapping and analysis using **Sentinel 2's satellite imagery**.
- Implemented an end-to-end ML model using XGBoost library in Python for the prediction of multispectral band values in presence of cloud distortions which increased the accuracy by 6%.

Data Science Intern | Liasas Foras Real Estate Rating & Research | Mumbai May, 2019 - Jun, 2019

- Built an ensemble ML model for real estate price prediction for the Mumbai market (using Random Forest, XGBoost, etc.), incorporating **Google Maps API-derived travel distances to achieve an R^2 of 0.87** with an acceptable RMSE.

SKILLS

Programming Languages: Python, R, SQL
Softwares and Libraries: MS Office, Pandas, NumPy, Sk-learn, Matplotlib, TensorFlow, Arc GIS, QGIS, Beautifulsoup
Certifications: Machine Learning, Deep Learning - 5 course specialization by deeplearning.ai (Coursera)

AWARDS

- Team secured 1st place in ZS's business case competition during the new joiners' Bootcamp session. (2021)
- Won a silver medal in the table tennis singles event at the Zest'20, the national level sports fest of COEP. (2020)
- Won a gold medal at the national level football tournament at the NOSPlan Competition, Ahmedabad. (2018)
- Qualified for All-India finals round of debate competition at the National Planning Convention, Ahmedabad (2018)
- Team secured 1st place in the dance category in Firodiya Karandak, state level cultural festival, Pune. (2018)
- Won multiple medals at the District and State-level Rope-Skipping Championships, Maharashtra. (2014)
